Admission

The objective of the admission policy is to select students on a competitive basis for the MBM program.

Requirements

A graduate in any field of study with minimum 16 years of schooling having at least one first division/class and no third division/class in any examination is eligible to apply. CGPA equivalence for those who have passed under Division/ Class system is as follows:

For Graduation/Post-graduation

Division/Class	Equivalent CGPA (on a 4 point scale)
First	3.50 and above
Second	2.75 to less than 3.50

For SSC/HSC

Division/Class	Equivalent CGPA (on a 5 point scale)
First	4.00 or A and above
Second	3.00 or B to less than 4.00 or A

Selection Process

All applicants, fulfilling the minimum requirements, sit for an admission test comprising MCQ and written sections. The admission test is of 150 minutes; 90 minutes for the MCQ and 60 minutes for the written portion.

The MCQ section of the Test is designed to assess the general merit of the applicant. The question structure and distribution of marks for the MCQ are as follows :

Section	Topic	Marks
English Proficiency	Antonym, synonym, analogy, substituting in a single word, sentence correction, sentence completion, comprehension, etc.	40
Mathematics and Analytical Ability	Arithmetic, algebra, geometry, tables, graphs, critical reasoning and data sufficiency, etc.	50
General knowledge and Current Affairs		10
Total		100

The written section of the test focuses on the writing ability of the applicant in English. The question structure and distribution of marks are as follows:

Writing Areas	Marks
Essay Writing	15
Reading Comprehension/Precis	10
Translation into English	10
Argument/Dialogue	15
Total	50

Subject to attaining a minimum percentage of marks in different sections of the admission test, a maximum of top 200 applicants will be called for viva-voce. Viva-voce will carry 10 marks.

Regardless of the score in the admission test, an applicant will not be in the final merit list unless he/she obtains a minimum marks in the viva-voce. The final merit list of 80 students will be prepared according to the total marks obtained in the admission test and viva voce. However, 20 seats of the final merit list will be reserved for the bank nominated applicants subject to being included in the list of top 200 applicants. In this regard, maximum number of finally selected from a bank will be five.

Application Procedure and Schedule

Any eligible candidate must apply in the prescribed form. The form along with a copy of prospectus and sample test is available at the DSBM office on payment of Tk. 1000/- (non-refundable). These can also be obtained from BIBM website.

 A. PSRQ B. RQPS C. RPSQ D. SQPR

VIII. Read carefully the given writings and answer the questions placed below the passage: (Q. 36 - 40) **1 × 5 = 5**

The food we eat seems to have profound effects on our health. Although science has made enormous steps in making food more fit to eat, it has, at the same time, made many foods unfit to eat. Some research has shown that perhaps eighty percent of all human illnesses are related to diet and forty percent of cancer is related to the diet as well, especially cancer of the colon. People of different cultures are more prone to certain illness because of the characteristic of foods they consume.

That food is related to illness is not a new discovery. In 1945, researchers realized that nitrates and nitrites (commonly used to preserve color in meats) as well as other food additives caused cancer. Yet, these carcinogenic additives remain in our food, and it becomes more difficult all the time to know which ingredients on the packaging labels of processed food are helpful or harmful.

The additives that we eat are not all so direct. Farmers often give penicillin to cattle and poultry, and because of this, penicillin has been found in the milk of treated cows.

Sometimes similar drugs are administered to animals not for medicinal purposes, but for financial reasons. The farmers are simply trying to fatten the animals in order to obtain a higher price on the market.

A healthy diet is directly related to good health. Often we are unaware of detrimental substances we ingest. Sometimes farmers or others who do not realize the consequences add these substances to food without our knowledge.

36. How has science done a disservice to people?
 - A. Because of science, disease caused by contaminated food has been virtually eradicated
 - B. It has caused a lack of information concerning the value of food
 - C. As a result of scientific intervention, some potential harmful substances have been added to our food.
 - D. The scientists have preserved the color of meats, but not of vegetables.
37. The word "prone" in line 5 is nearest in meaning to
 - A. supine
 - B. unlikely
 - C. healthy
 - D. predisposed
38. What are nitrates used for?
 - A. They preserve flavor in packaged foods
 - B. They preserve the color of meats
 - C. They are the objects of research
 - D. They cause the animals to become fatter
39. In line 9, the word "carcinogenic" is closest in meaning to
 - A. Trouble-making
 - B. Color-retaining
 - C. Money-making
 - D. Cancer-causing
40. All of the following statements are true EXCEPT
 - A. drugs are always given to animals for medical reasons
 - B. some of the additives in our foods are added to the food itself and some are given to the living animals
 - C. researchers have known about the potential hazards of food additives for more than forty-five years.
 - D. food may cause forty percent of the cancer in the world.

Section B: Mathematics

Marks : 30

Choose the correct answer: (Q. 41-70).

1 × 30 = 30

41. Price of 5 chairs and 2 tables is Tk. 1350. Two chairs cost as much as one table. What is the price of one chair and one table?
 - A. Tk. 350
 - B. Tk. 450
 - C. Tk. 500
 - D. Tk. 550
42. A student who secures 20% marks in a test fails by 30 marks. Another student who secures 32% marks gets 42 marks more than those required to pass. What is the percentage of marks required to pass?
 - A. 33%
 - B. 30%
 - C. 25%
 - D. 28%
